

Maya Beauty Engineering

Look does matter

MBE: bedrijfsinformatie

Since 1988, **MBE** has been an ally for all those people for whom looking after themselves is important: it is one of the first Italian manufacturers of electro-medical units and medical devices.

Thanks to constant research and precious cooperation with university, engineers and experts of the medical field, **MBE** has perfected the manufacture of technologies such as radiofrequency, ultrasound, oxygen treatments, connective massage, electroporation and microdermabrasion.

Microdermabrasie

GREY MATE

Microdermoabrasion. Tachi-percussion. Photo- Vibrating massage.

Characteristics

- It provides soft exfoliation, promoting cell renewal without causing any irritation.
- It progressively reduces wrinkles, discolouring and stretch marks and skin thickening.
- It allows skin care products to be applied extremely gently through a pleasant photo-vibrating massage which calms, drains, relaxes and detoxifies the tissue and stimulates its regeneration.
- It allows the operators to personalise their work, adapting the intensity of the treatment and the photo-massage to each individual specific case.

Dimensions
40 x 40 cm

Weight
about 6 Kg

Chromatic spectrum provided

RED: Stimulating,
ORANGE: Energising,
YELLOW: Detoxifying,
GREEN: Rebalancing/anti-bacterial,
BLUE: Calming, relaxing,
INDIGO: Toning, astringent,
VIOLET: Remineralising, healing

Preset programs

Peeling
Wrinkles
Spots
Stretch marks
Imperfections caused by scars
Keloids

GREY MATE

Face & Body Photo Vibrating massage.

Light at the service of beauty.

The photo vibrating massage handpiece combines a special vibrating massage (ideal for tissue regeneration, for the reactivating cell metabolism and for body myorelaxing) provided with 7 leds, each of which has a specific chromatic Intensity and different effects.

Exploiting the effects produced in the skin tissue by the different wave lengths selected, it is possible to strengthen the final effect of the treatment, calming the skin when necessary, by helping to detoxify, stimulating and energizing an asphyctic tissue, stimulating the skin's regenerative processes, etc. In this way the cells of the treated area benefit from yet another wellbeing treatment, reacting ad hoc depending on the light applied.

Oxy Xtra Med (zuurstof)

The Maya Beauty Engineering **Oxy Xtra Med** device administers pressurised (hyperbaric) oxygen for skin treatment and provides oxygen through inhalation.

Considering the scientific literature existing at the moment of release of this manual, what follows are the presumed clinical/therapeutic indications for oxygen used as a coadjuvant in the therapy of:

Ulcers

Sores

Skin density reduction and loss of hydration

Skin aging

Skin laxity / slackness

Torpid wounds/lesions

Fissures

This device can be used by medical/para-medical staff with adequate knowledge of human anatomy and prior therapeutic and operating instructions from the doctor. This device may only be installed in suitably equipped environments (e.g.: hospitals, clinics, doctor's surgeries, etc.). The **Oxy Xtra Med** device is not suitable for life support and does not provide any patient monitoring function. Continuity of service is not required.

OXYGEN INFUSION using pressurised oxygen jet (hyperbaric)

Oxygen Infusion is a way of introducing oxygen molecules into the subject (upper skin layer, approximately 35 µm up to 80 µm in thickness) who is been treated for clinical/therapeutic purposes without damaging skin.

Techniques for using the handpiece:

Jet technique

Continuous circular technique

Linear pressure technique

TECHNICAL DATA

AIRBRUSH FOR OXYGEN SPRAY and for distilled water and oxygen mixture spray

The mixture of 93% oxygen-enriched air delivered using the **Oxy Xtra Med** device can also be used by medical professionals for the following functions:

Oxygen Spray using Airbrush

Mixture of distilled water and oxygen using Airbrush

OXYGEN SPRAY USING AIRBRUSH

The Oxygen Spray function enables operators to treat skin irritations, reddening and inflammation.

MIXTURE OF DISTILLED WATER AND OXYGEN SPRAY USING AIRBRUSH

The possibility of spraying a distilled water and oxygen mixture by airbrush enables the operator to treat skin irritation, reddening and inflammation in a fresh, pleasant way.

Treatment consists in pure oxygen mixed with distilled water sprayed from a specific airbrush tank.

OXYGEN INHALATION

The air mixture enriched with 93% oxygen delivered by the **Oxy Xtra Med** device can also be used by medical professionals for Oxygen Inhalation.

Radio Frequentie

So Up
RELOADED

Imagine an unprecedented synergy between connective tissue massaging, modulated radiofrequency, ultrasound and photodynamics! It sounds impossible, doesn't it? But today it actually exists, and with an irresistible extra feature: **Myo Regeneration®**. Thanks to micro electrical impulses, combined with modulated radiofrequency, the muscle is micro thermally stimulated and consequently the figure is progressively remodelled. **So Up Reloaded**. More than just a name, So Up Reloaded is a genuine promise of well-being: infinite actions converge towards an incredible result. A diverse and highly effective series of wellness oriented treatments that will not cramp your customers' lifestyle in the least. So let's have a look at them, one by one.
